1. Executive Summary

The objective of this project is to develop a web-based travel booking platform that enables customers to search, compare, and reserve flights and hotels through a single unified interface.

The platform will provide real-time availability, pricing information, secure payment processing, booking management, and customer support capabilities.

The solution aims to increase travel booking convenience, improve customer experience, generate commission revenue, and create opportunities for future expansion into vacation packages, car rentals, and travel insurance.

2. Business Objectives

Primary Objectives

- Provide a one-stop travel booking solution.
- Increase online booking conversions.
- Generate revenue through booking commissions and service fees.
- Reduce manual booking processes.
- Improve customer satisfaction and retention.

Success Metrics

- Booking conversion rate > 5%
 - Customer satisfaction score > 90%
 - System uptime > 99.9%
 - Payment success rate > 98%
 - Repeat customer rate > 25%
-

3. Stakeholders

Stakeholder	Role
Business Owner	Project sponsor
Product Manager	Requirements ownership
Travel Suppliers	Flight and hotel inventory providers
Customers	End users
Customer Support Team	Booking assistance
Finance Team	Revenue and payment management
Marketing Team	Promotions and campaigns
Development Team	Platform implementation

4. Business Scope

In Scope

Flight Reservations

- Search flights
- Filter flight results
- Compare flight options
- Select seats (if supported)
- Reserve and purchase tickets
- View itinerary
- Cancel bookings
- Request refunds (subject to airline policies)

Hotel Reservations

- Search hotels

- View room availability
- View hotel details
- Book rooms
- Cancel reservations
- Manage hotel bookings

Customer Account Management

- User registration
- User login
- Password recovery
- Profile management
- Booking history

Payment Processing

- Credit cards
- Debit cards
- Digital wallets
- Booking confirmation

Notifications

- Booking confirmations
- Cancellation confirmations
- Payment receipts
- Travel reminders

Out of Scope (Phase 1)

- Car rentals
- Cruise bookings
- Vacation packages
- Loyalty rewards program
- Travel insurance sales
- Corporate travel management

5. User Types

Guest User

Can:

- Search flights

- Search hotels
- View prices
- Register account

Cannot:

- Complete booking without providing traveler details
-

Registered Customer

Can:

- Book flights
 - Book hotels
 - Manage reservations
 - Save traveler profiles
 - View booking history
-

Administrator

Can:

- Manage suppliers
 - Manage promotions
 - View reports
 - Handle customer issues
 - Manage content
-

6. Functional Requirements

Flight Search

FR-001

The system shall allow users to search flights using:

- Origin
- Destination
- Departure date
- Return date
- Passenger count
- Cabin class

FR-002

The system shall display:

- Airline
- Flight number
- Departure time
- Arrival time
- Duration
- Number of stops
- Price

FR-003

The system shall allow sorting by:

- Price
 - Duration
 - Departure time
 - Arrival time
-

Hotel Search

FR-004

The system shall allow hotel searches by:

- Destination
- Check-in date
- Check-out date
- Number of guests
- Number of rooms

FR-005

The system shall display:

- Hotel name
- Rating
- Room types
- Amenities
- Images
- Price

FR-006

The system shall support filtering by:

- Price range
 - Star rating
 - Amenities
 - Location
-

Booking Management

FR-007

The system shall allow users to create reservations.

FR-008

The system shall generate unique booking references.

FR-009

The system shall store booking history.

FR-010

The system shall allow booking cancellations according to supplier policies.

Payments

FR-011

The system shall process secure online payments.

FR-012

The system shall generate payment receipts.

FR-013

The system shall support multiple currencies.

Notifications

FR-014

The system shall send booking confirmations via email.

FR-015

The system shall send cancellation confirmations.

FR-016

The system shall send travel reminders before departure.

7. Business Rules

BR-001

A valid payment must be completed before reservation confirmation.

BR-002

Flight prices are subject to supplier availability.

BR-003

Hotel room availability must be verified before booking confirmation.

BR-004

Cancellation fees are governed by supplier policies.

BR-005

Refund amounts are calculated according to applicable cancellation rules.

BR-006

Traveler information must comply with airline requirements.

8. Non-Functional Requirements

Performance

- Search results returned within 3 seconds.
- Booking confirmation within 10 seconds.

Availability

- 99.9% uptime.

Security

- PCI-DSS compliant payment processing.
- Encrypted user data.
- Secure authentication.

Scalability

- Support 100,000+ users.
- Support peak holiday traffic.

Usability

- Responsive design.
 - Mobile-friendly interface.
-

9. Reporting Requirements

The platform shall provide reports for:

- Total bookings
 - Revenue
 - Booking trends
 - Cancellation rates
 - Top destinations
 - Customer activity
-

10. Risks

Risk	Impact
Supplier API downtime	High
Payment gateway failure	High
Pricing discrepancies	Medium
Security breaches	High
Seasonal traffic spikes	Medium

11. Assumptions

- Flight inventory will be provided through airline/GDS APIs.
- Hotel inventory will be provided through hotel supplier APIs.
- Online payment gateways will be available.
- Users will have internet access and valid payment methods.

12. Future Enhancements

- Car rentals
- Travel insurance
- Vacation packages
- AI travel recommendations
- Loyalty program
- Mobile applications
- Corporate travel portal
